mariorodriguezan@gmail.com | Github | Medium | Linkedin | Website

Full-stack web developer with a passion for problem-solving. With experience in Ruby on Rails, JavaScript, and React I discovered web development while taking computer science classes and I fell in love with it. I bring strong skills in working with people, communication in English and Spanish as well as managing people. I spend my free time playing guitar as well as building small projects and learning about new technologies.

TECHNICAL SKILLS

Ruby on Rails, JavaScript, React.js, HTML, CSS, SQL, Git , Puppeteer.js. *Familiar*: Java, Node.js, Express,js, PHP, Twig

TECHNICAL PROJECTS

UberEats Hotzone - Github
UberEats HotZone is an application that allows the user to find all the restaurant's busy times of specific cities around us.
+ Implemented using react native to display an interactive map with users' current location.
+ Developed a Node.js API backend.
+ Implemented Puppeteer.js to scrape data from multiple web pages.
+ Developed a Express.js API backend.

Translate Me - Github Demo
 Translate me uses a machine learning technology to classify and translate images into different languages. Once the image is captured, users can flip the image to reveal the desired translated word for the image.
+ Implemented user interface employing React with Semantic-React for styling.
+ Developed a Rails API backend.
+ Implemented IBM Visual Recognition to classify images users upload.
+ Implemented IBM Language Translator to translate words users select
+ Utilized Cloudinary to save images users upload

Rick and Morty Adventures - Github Demo
Rick and Morty Adventures is an RPG game that allows you to play as Rick and capture different Morties. In addition, users have to look after each Morty they capture and help them level up by keeping them healthy and fed.
+ Developed a Rails API backend.
+ Implemented user interface employing React with Semantic-React for styling.
